

The MAJOR Hook Loader Tanker

The MAJOR Hook Loader tanker is a truck mounted tanker with a capacity of 2800 Gallons (12,729 litres). This tanker has been designed for dust suppression, drain/sewer clearance & cleaning, sludge collection and septic tanker emptying.

The tanker is constructed from 6mm steel and is baffled to eliminate a wave motion during transport.

There are wide support pads on the tanker to spread the weight over the mounting points thus reducing tension & stress.

Standard Features:

- 6" filler points on the sides & rear
- Choice of couplings can be connected to the filler points (3", 4" & 5")
- 43" hinged back door.

Optional Extras

- Toolbox
- Trough for carrying hose
- Full length sight tube
- Hydraulic powered 8000 l/min pump
- Hydraulic powered High Pressure Water Pump with auto cut off when tank is empty to protect water pump.
- Hydraulic rewind Hose Reel

This unit is suitable for various applications including:

- Dust Suppression
- Drain clearance & cleaning
- Sludge collection
