

Power Harrow

The **MAJOR ROTARY HARROW** is the perfect solution for seedbed preparation as spring steel blades aggressively churn soil to a depth of 6". The roller gently levels off the aerated soil, leaving a bed perfect for seeding.

The tractor is prevented from transmission damage by a slip clutch controlled PTO Shaft. The compact gearbox & bed are completely oil immersed ensuring all moving parts are lubricated.

Standard Equipment:

- 3-Point linkage
- PTO shaft with shear pin & slip clutch
- L shaped blades
- Levelling rear roller
- Kit safety guards CE
- Packer roller

MODEL	Operating Width (mm)	Power (Hp)	No. of Blades	PTO RPM	Blade Depth	Weight (kg)
