

# STATIC TANKER

The MAJOR Static Tanker is a self contained unit for effluent clearing. This model can be flat bed truck or skip mounted or on-site.

Lifting lugs & chain mounts are located on each corner for ease of transport. Forklift mounts are located on each side.

The galvanised tank is constructed of 6mm steel with the internal water tank centrally located for ease of use.

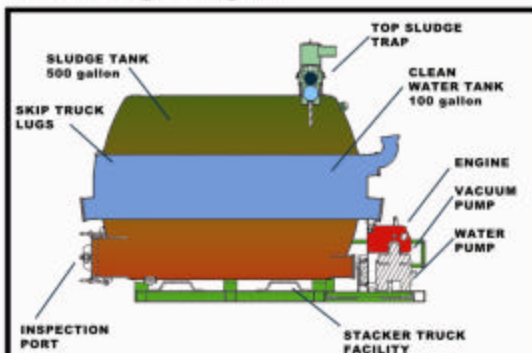

The ergonomic operations area houses the pumps and engine & is guarded with a bolt-on safety cage.

Safety, as always, is paramount at MAJOR with explosion & implosion valves fitted to the tank & pump. The vacuum pump is protected from contamination by two sludge traps.

**500 gallon sludge tank**  
**100 gallon clean water tank**  
**3000 litre vacuum pump**  
**HONDA WX10 water pump**  
**Safety Cage,**
