

Stone Rake

The MAJOR M1500 Stonerake grades rough or scarified soil, removes stone, sods, roots, sticks and similar debris.

The innovative machine also aerates the soil leaving a gently harrowed area. The precision set steel tines penetrate the soil digging down to remove buried stone ensuring the top layer of soil is stone free.

The MAJOR 1500 Stone Rake is designed to product a well-screened, level, stone free surface in one step for:

- site preparation
- Landscaping
- Athletic fields & park fields
- Golf course construction

Features:

- 1.5 (5ft) operating width
- Hydraulic offset as standard
- Slip clutch PTO drive
- 1" pitch Duplex chain drive
- 15-60 HP requirement
- Precision height adjustable
