

T350 Dust Supression Unit

New to the market is the MAJOR T350-DSU. This is a compact steel tank bowser robustly constructed with RHS corner protection & integrated Water Spinner.

The T350-DSU is simple to operate, requiring only one hydraulic connection control for both the hydraulic motor & gate valve.

Integrated slots house the fork-lift /teleporter forks locking the machine during transportation. A three point linkage model is also available.

An in-line speed controller varies the speed of the motor if required. The water is gravity fed onto the spinning disc & instantly atomised & dispersed by the fan. A full length sight tube shows the water level.

Safety is paramount at MAJOR, with the high speed disc fully enclosed & the complete machine designed to CE regulations.

SUITABLE FOR:

- TELEPORTER
- FORKLIFT
- TRACTOR 3 POINT LINKAGE

Weight empty 410 kg
Weight full 1900 kg
