

# Flail Collectors

Heavy duty cut and collect flail units

There are two categories of MAJOR Flail Collector available and suitable for a variety of applications.

The MAJOR MJ27-155 Flail Collector has been designed for use with small compact tractors and is perfect for cutting and collecting on all types of grass, from lawns to conservation areas. It can be used during autumn to pick up leaves, litter and even hedge clippings.

The MJ27-160 and MJ27-180 Green Bee medium duty flail collectors allow mowing, scarifying, collecting, chopping and rolling all in one pass.

The MJ27-160 and MJ27-180 flail collectors are suitable for use in many environments including sports and golf grounds,

pastures, airports, airfields, paddocks, camp sites and public and private parks.

The grass can be collected and disposed of using the large capacity collector. The discharging height is 2.2m.

“The MAJOR Green Bee clears the broom and gorse in one-pass which leads to quick grass recovery and improves the rough. This is particularly beneficial in some areas, where players used to spend a lot of time looking for wayward balls. Now, it’s much easier and less time consuming for our members.”
