Cyclone Shredder

Heavy duty mulcher and shredder

Durability, reliability and efficiency are the key elements of the award-winning MAJOR Cyclone Shredder. From traditional pasture topping to clearing crop stubble, these machines are equally at home in set-aside, forestry margin management, and sensitive environmental scrubland control.

These rotary mowers are designed for the most rugged working environments with reduced power consumption, outperforming equivalent-sized flail mowers in every way.

Its patented 'blender' double-chop blade system requires 25% less HP than a flail mower, slashing at least 25% off upfront fuel costs. The Cyclone Mower is the mower of choice for the toughest jobs.

High-performance Strenx™ 700 MC structural steel makes these mowers strong, while Hardox® 450 abrasion-resistant steel for the undersole discs ensures a long wear life. Combined with hot-dip galvanisation to EN ISO 1461:2009 specifications, the Cyclone is guaranteed impact tough.

Features

- ✓ Save a minimum of 25% on power consumption and fuel costs versus a similar sized flail mower
- ✓ Unique blade system for maximum mulching and shredding
- ✓ Low maintenance machine with less wearing parts than a flail mower
- ✓ Impressive forward speeds
- ✓ No wind rowing
- ✓ Heavy duty full-length rear roller
- ✓ Can be front or rear mounted (to be specified when ordering)
- ✓ The undersole discs produced from Hardox® 450.
- ✓ Even distribution of cut material
- ✓ Multi-purpose mower; ideal for heavy scrub and stubble management

The Major Cyclone handles all kinds of materials - we've used it on maize stubble, cover-crop, grassland, and one particularly difficult application down the tramlines in oil seed rape - and it just wizzed over it. It cost less than a used bat-wing, has hardly any maintenance costs, takes a lot less fuel to power it - it's a great machine.
