

Tri-Deck Roller Mower

Winged, Trailed

The MAJOR TDR range leads the market in wide area mowers. The patented three-point pivot system allows the three decks to glide over ground contours eliminating grass scalping. The exceptionally low maintenance trailed rotary mower is available in 4.9m and 6.1m working widths. Cutting rotors are fitted with two hardened and tempered blades with aerofoil qualities so material can be lifted and separated inside the cutting chamber.

The blades are synchronised to rotate in opposite directions and overlap each other by 75mm. This assembly combined with high blade tip speeds ensure all vegetation is finely cut and evenly dispersed for the perfect presentation.

In short grass this mower leaves a professional striped finish equivalent to that of a cylinder mower. The gear-driven drive line allows this machine to easily cope with heavier conditions. The machines wings can be folded up to a 90° angle giving a transport width of 2.5m.

The Major TDR is built with Strenx® 700 MC high performance steel which is lighter and stronger than conventional steel.

A galvanised finish protects the machine from corrosion for a longer working life.

Features

- ✓ Easily adjustable cutting height from 10mm – 140mm for year-round mowing
- ✓ Walterscheid wide angle PTO drive shaft supplied as standard
- ✓ Sealed internal roller bearings give protection against moisture and soil
- ✓ The rear deck can be removed and used independently of the wings
- ✓ Wings can be operated independently
- ✓ LED road lighting kit
- ✓ Turf tyres
- ✓ Braked axle available as an optional extra
- ✓ Remote control option
- ✓ 3-year MAJOR warranty

Our Major 16ft TDR can cut through grass 6' high and then I can take 10 minutes to adjust the sets and go and cut a football pitch or a cricket out field. To do that with a cylinder mower is impossible. It is running constantly at max power for 7 hours a day and it just doesn't miss a beat.
