

Log Splitter

The MAJOR Log Splitter is a galvanised machine which is robustly constructed to withstand the punishment of continuous use. Safety is paramount at Major, with the operator required to use both hands to control the hydraulic ram. The Log Splitter features a high carbon steel wedge

Product specifications	
Model	LS3000
Finish	Galvanised
Blade	Wedge blade
Operation	CAT I tractor linkage
Safety feature	Single person operation
Length	710mm
Height	1450mm
Max. Log Size	38cm
Weight	110kg
Pressure	14 tonne

that gives 14 tonne of hydraulic splitting force. It is quick and easy to fit to any tractor with a CAT I three point linkage. It will easily power through logs up to 38cm in height. The floor level log bed allows for easy positioning of logs into place for splitting.

Saw

The MAJOR Swinging Saw Bench fits on the tractors 3 point linkage and can cut up to 28cm (11") in depth.

It is equipped with a depth gauge and an extension piece for holding longer logs. The machine is fitted with wheels and an extending handle allowing the operator to easily tow the machine by hand into storage.

For operator safety both hands used in locking the material in place and for operating the swinging bench. The saw blade can be isolated from the PTO drive by the red pedal located at the base of the machine.

Product specifications	
Model	SAT Saw
Paint	Two pack
Working Width	28cm (11")
Power requirements	24 - 60 kW/ 30 - 80 hp
PTO rpm	540
