

Contoura Mower

Winged, Trailed

The Major Contoura Mower is a durable and versatile solution for the maintenance of challenging and undulating terrains. The robust frame coupled with the three mowing decks, allow the machine to glide over ground contours, to give a consistent and unrivalled quality-of-cut.

This mower gives efficient mowing, even on dense grass. The cutting height can easily be adjusted from 10 – 110mm making it ideal for fairway and rough turf maintenance and delivers professional turf striping every time. Strenx™ 700 MC high-strength steel is used to manufacture this mower.

Model	MJ75-360
Overall Width	3.67m (12')
Working Width	3.60m (11' 9")
Transport Width	2.14m (7')
Power (HP)	45-75 HP
PTO rpm	540
Cutting Height	10-110mm
Rotors	6
Blades	12
Weight	1395kg
Blade tip speed	86 m/s
Mowing Rates (Acres/hr at 7mph)	10

“

One big plus from the Contoura is that it doesn't have a belt drive, which always seems to be the weakest part of a mower. Instead, it's gear-driven and therefore handles even heavy grass with ease. We use a Kubota L5030 tractor which is only fifty horsepower and the Contoura is not hard to drive - it doesn't leave trackings - even when the ground conditions are wet.

Richard Thompson, Head Green-keeper, Ballybofey & Stranorlar Golf Club, Co Donegal

Features

- ✓ Unique pivoting frame with self-aligning spherical bearings, allow the mowing decks to follow the ground contours with ease
- ✓ Kerb lift; the mowing decks can be raised off the ground to avoid obstacles, without disengaging the PTO
- ✓ Zero turn capability allows tight turns or mowing around obstacles without turf damage
- ✓ Full width rollers follow undulations to give a consistent cut, in both hilly and less challenging terrains
- ✓ Gear driven drive line, eliminates the problems associated with belt driven mowers
- ✓ Internal roller bearings give total protection against moisture and soil
- ✓ Two blade systems in one; a simple adjustment converts the blade from rigid blade to swinging blade.
