

# Flail Collectors

Heavy duty cut and collect flail units

There are three categories of MAJOR Flail Collector available and suitable for a variety of applications.

The MAJOR MJ27-155 Flail Collector has been designed for use with small compact tractors and is perfect for cutting and collecting on all types of grass, from lawns to conservation areas. It can be used during autumn to pick up leaves, litter and even hedge clippings.

The MJ27-160 and MJ27-180 Green Bee medium duty flail collectors allow mowing, scarifying, collecting, chopping and rolling all in one pass. The MJ27-160 and MJ27-180 flail collectors are suitable for use in many environments including sports and golf grounds, pastures, airports, airfields, paddocks, camp sites and public and private parks.

The grass can be collected and disposed of using the large capacity collector. The discharging height is 2.2m.

The MAJOR MJ2000 Flail Collector is designed to perform even in the most extreme conditions and is suitable for use with larger compact and agricultural type tractors.

The floating linkage allows the machine to follow the ground contours ensuring a perfect finish. BKT turf tyres keeps turf compaction to a minimum.

The cutting height can be adjusted from 12mm - 150mm.

“

*We mow somewhere around 200 – 300 hectares of bracken each year with our Major MJ2000 Flail Collector. We're very impressed with how robust it is. It's definitely the strongest of the flail grass collectors that we investigated and within in a really competitive price bracket as well.*

Mike Payne, Ranger, Ashdown Forest, UK
